

## **Group Project:**

**By: Baby\_Sahnaj and Khushal Sharma:**

In today's era of people becoming more and more workaholic, They always either ignore or neglect the fact that their house also needs to be taken care of. And I do not blame them because most of the people are so busy that they do not even get time to take care of themselves. So, to tackle the situation I want to come up with an application that can assure that you will not have to deal with cleaning drill as least as possible.

The app is going to work like this. You open the app. Then you select the type of cleaning you want for the house where we will have all the options for you. From simple dusting to vacuuming and deep suction of the beds and cushions. Then you enter your credentials with location and address of your house and card details for payment and then hit the 'submit'. Cleaning department will receive your request get your work done within an hour or two.
